

## **AVK are the best worldwide supplier!**

At SDMO's recent worldwide distributor conference at Punta Cana in the Dominican Republic, AVK were presented with an award for the 'Best Global Power Solutions Provider'.

AVK are recognised as a leader in the UK for providing large engineered diesel standby power projects.

Chris Pritchard, Managing Director of AVK|SEG (UK) Ltd, said "This is a great achievement given the amount of distributors and providers SDMO have worldwide. I therefore congratulate everyone involved on their efforts enabling us to win this prestigious award. It has, however, set somewhat of a benchmark - we will be looking to retain this award at the next conference in two years' time. We will continue winning large complex engineering solutions. This is something we have structured our business upon, and we need to continue our activities in this area as efficiently as possible.

Recent projects include a major Data Centre installation with 11kV generation, mostly using multiple generators with a ratio between 2mVA and 3mVA, together with state of the art microprocessor-based

Kerys control... ([Read More](#))
